

AMENDMENTS TO THE DRAWINGS

Attached hereto are four (4) sheets of corrected formal drawings that comply with the provisions of 37 C.F.R. § 1.84. The corrected formal drawings incorporate the following drawing changes:

Fig. 9 has been corrected as outlined by the helpful suggestion by the Examiner. Even more specifically, the Encoded Region Designator 45 is now connected to the Region Selector block 2n instead of DCT 2b.

Furthermore, Figs. 12 and 13 have been designated by the label "Conventional Art" as these figures merely illustrate background or conventional art.

In addition, Fig. 5 has been corrected such that the logical circuit 42g is an AND circuit rather than an OR circuit such that this drawing is consistent with the second embodiment as discussed in the specification.

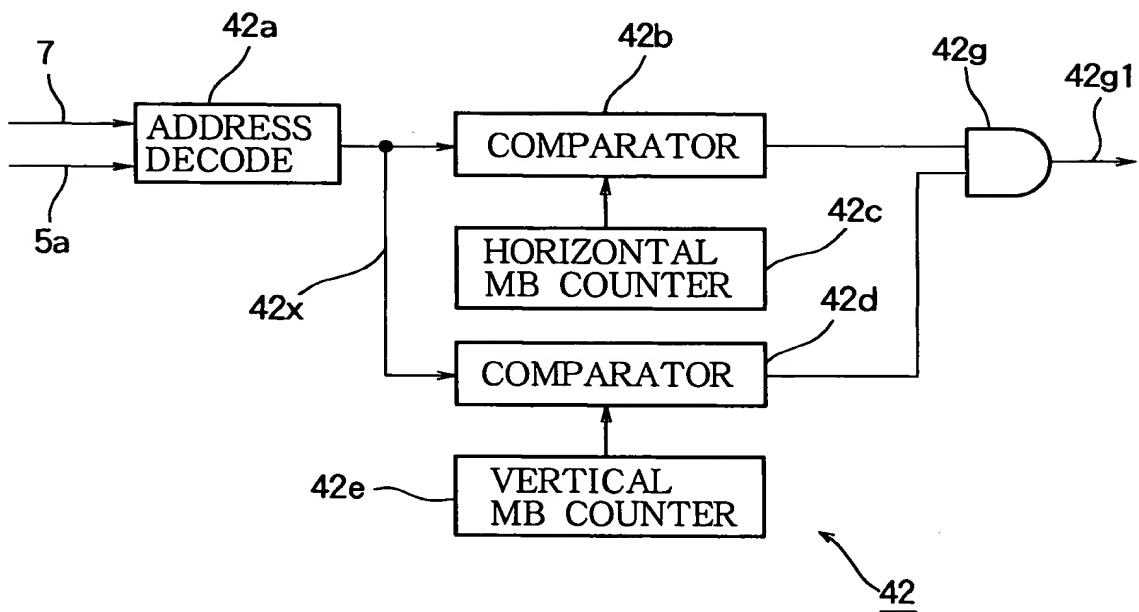

It is respectfully requested that the corrected formal drawings be approved and made a part of the record of the above-identified application.
